(57) **ABSTRACT**

The present disclosure discloses a signal receiving and sending method, a node and a network side device. The information receiving method includes obtaining target information, wherein the target information includes first information and/or second information; obtaining wake-up information according to the target information, wherein the wake-up information obtained according to the first information includes at least one of area-level wake-up information, cell-level wake-up information, or node group-level wake-up information, wake-up information obtained according to the second information includes at least one of the node group-level wake-up information and node-level wake-up information; performing waking up or continuing to sleep according to indication of the wake-up information.
