(57) **ABSTRACT**

A storage and charging station system for mobile electronic devices is described. The storage and charging station system includes a support tower structure including shelves for storing the mobile electronic devices during charging, a support device coupled to the support tower structure, a grid system on one side of the support tower structure, the grid system for mounting various accessories, a wire management system positioned adjacent to each of the shelves, a cable management system coupled to one side of the support tower structure, and a power distribution unit coupled to the support tower structure.
