(57) **ABSTRACT**

The present disclosure provides a pixel structure, a display substrate and a display device, and relates to the field of display technology. The pixel structure includes a plurality of sub-pixels located in an imaginary quadrilateral, the plurality of sub-pixels include a first color sub-pixel, a second color sub-pixel and at least one third color sub-pixel, the imaginary quadrilateral includes a first inner corner and a second inner corner that are opposite to each other, and a third inner corner and a fourth inner corner that are opposite to each other. The first color sub-pixel is located at the first inner corner **c1**, the second color sub-pixel **22** is located at the second inner corner **c2**, and at least one third color sub-pixel is located at the third inner corner **c3** and the fourth inner corner **c4**.
