(57) **ABSTRACT**

A modular data center includes: a modular information technology component (MITC), in which the MITC includes an information handling system (IHS) and a utility control component (UCC), in which the IHS and the UCC are affixed to a bottom side of the MITC; and a front access component and a rear access component, in which the front access component is connected to a front side of the MITC, in which an area of the front access component is equal to an area of the front side of the MITC, in which the rear access component is connected to a rear side of the MITC, and in which an area of the rear access component is equal to an area of the rear side of the MITC.
