ABSTRACT

An application on a viewer client device receives a user input to access a live stream, sends a request to access the live stream, presents information allowing a user to indicate a first anchor of a plurality of anchors of the live stream, the first anchor corresponding to a timestamp for starting a portion of the live stream, receives user input identifying the live stream and user input indicating the first anchor of the live stream, and displays the live stream beginning at the timestamp corresponding to the first anchor of the live stream.
