(57) **ABSTRACT**

A tracker module is provided that includes a module laminate and one or more integrated circuits that are disposed on the module laminate and that includes an integrated circuit. The integrated circuit includes a switch included in a pre-regulator circuit, at least one switch included in a switched-capacitor circuit, a first IC terminal connected to the switch included in the pre-regulator circuit, and a second IC terminal connected to one of the at least one switch included in the switched-capacitor circuit. The at least one integrated circuit includes a switch included in a supply modulator. The module laminate includes a signal line with which the first IC terminal is connected to the second IC terminal.
