**ABSTRACT**

A display device including a plurality of pixels and configured to display images, wherein the plurality of pixels comprise a first pixel row and a second pixel row adjacent to each other along a first direction, a first pixel, comprising a first group of a first plurality of subpixels, is repeatedly arranged along the first pixel row in a second direction perpendicular to the first direction, the second pixel row is shifted by a first distance in the second direction from the first pixel row, and the first distance is less than or equal to half a size of any one of the plurality of sub pixels in the second direction.
