(57) **ABSTRACT**

A computer-implemented method and a system are provided for amending sent text-based messages. One example computer-implemented method includes obtaining, from a source, a text-based message and receiving, at a user device, an inquiry of a portion of the text-based message. The computer-implemented method further includes requesting, from a network, data based on the inquiry of the portion of the text-based message, amending at least the portion of the text-based message based on the data, and presenting the amended portion of the text-based message at the user device.
