**ABSTRACT**

A display device includes a display panel, a sensor layer disposed on the display panel, an anti-reflection layer disposed on the sensor layer, where the anti-reflection layer includes a colorant, and a protection member disposed on the anti-reflection layer, where the display panel includes a base substrate, a light emitting element disposed on the base substrate, and an encapsulation layer disposed on the light emitting element, where the protection member includes a base layer, and a protection layer disposed on at least one selected from an upper surface and a lower surface of the base layer, where the protection layer includes a hard coating agent and an ultraviolet light absorber.
