(21) Appl. No.: **18/289,575**

Provided is a flexible display substrate, including: a periph-
eral region and a display region. The peripheral region
surrounds the display region. The peripheral region has a
plurality of corner regions, and at least one of the corner
regions includes two first regions and a second region
disposed between the two first regions. The first region has
a hollow structure, and the second region has at least one
notch disposed in an edge of the flexible display substrate.
