(57) **ABSTRACT**

A curved display panel, a manufacturing method thereof, and a display device are disclosed. The curved display panel includes an encapsulation layer and a touch control functional layer. The encapsulation layer includes a first barrier layer, an organic layer, and a second barrier layer, and the touch control functional layer includes a first interlayer insulating layer, a touch control electrode layer, and a second interlayer insulating layer. At least one of the second barrier layer, the first interlayer insulating layer, or the second interlayer insulating layer is a composite film layer including inorganic sublayers and organic sublayers disposed alternately.
