A portable display system for multiple cameras enables a portable display device to wirelessly connect to multiple cameras and display video feeds without usage of a third-party network or server. Versions of the system include a housing containing a battery; a subcomponent housing; an energy storage module mechanically coupled to the subcomponent housing; a user interface fixed to the subcomponent housing, and including a speaker, a microphone, and at least one manual input, the user interface adapted to communicate a command from a user; a communication module fixed to the subcomponent housing and electrically coupled to the energy storage module, the communication module including multiple transceivers electrically coupled to the energy storage module, the transceiver configured to communicate with at least one remote camera; and a memory electrically coupled to the energy storage module.
