**ABSTRACT**

An electrochemical cell includes a housing defining an interior space of the electrochemical cell; and a lid disposed on a first face of the electrochemical cell defined by a length and a thickness of the housing. A dimension of the housing extending perpendicular to the first face of the electrochemical cell is a height of the housing, and the length of the housing is greater than the height of the housing. An anode and a cathode are disposed in the interior space of the electrochemical cell, and at least one of the anode or the cathode is connected to the lid.
