(57) **ABSTRACT**

(22) Filed: **Jan. 10, 2023**

An image pickup apparatus includes, in order from an image side to an object side along an optical axis a first base member, a second base member fixed to the first base member, an image sensor substrate having an image sensor mounted thereon, and being fixed to the second base member, and a structural member configured to support a lens. A linear thermal expansion coefficient of the second base member is larger than that of the first base member.
