ABSTRACT

A power strip having a cable-winding structure includes a power strip body and a cable. The power strip body includes a casing. The casing has a casing panel portion and a casing bottom portion that are disposed on opposite sides of the casing. The casing panel portion has electrical outlets thereon. The cable has a plug on an outer end thereof. The casing bottom portion has a first cable take-up block, a second cable take-up block spaced apart from the first cable take-up block, and a non-electrical outlet for the plug to be plugged and positioned in the non-electrical outlet. The cable can be wound around cable-winding portions of the first cable take-up block and the second cable take-up block.
