(57) **ABSTRACT**

Embodiments of this application provide a physical layer protocol data unit transmission method and an apparatus. The method includes: A first communication apparatus may receive a trigger frame that is for indicating a first resource unit allocated to the first communication apparatus, and sends a physical layer protocol data unit PPDU on a part of or all of the first resource unit, where the first resource unit is a resource unit whose quantity of tones is greater than 996; or the first resource unit is a multiple resource unit MRU, and the MRU includes at least one resource unit whose quantity of tones is greater than or equal to 996.
