(57) **ABSTRACT**

(22) Filed: **Mar. 24, 2023**

Embodiments of this application disclose a session establishment method and a network device. One example method includes: A first network device receives a first message from a second network device, where the first message includes configuration information corresponding to a first interface, the second network device is connected to the first network device through the first interface, and the configuration information corresponding to the first interface includes an internet protocol IP address of the first interface; and the first network device establishes a BGP session with the second network device based on the configuration information corresponding to the first interface.
