A wireless charger and a desk are disclosed. The wireless charger includes a base, a charging stand, a driving assembly and a controller. The charging stand is connected to the base and is rotatable around a horizontal axis relative to the base, and the charging stand is configured for placing an electronic device and wirelessly charging the electronic device. The controller is electrically connected with the driving assembly and configured for controlling the driving assembly to drive the charging stand to rotate from an initial posture to an upright posture in response to placing the electronic device on the charging stand. When the charging stand is in the upright posture, an included angle between the electronic device placed on the charging stand and a horizontal plane is greater than 0 degree and less than or equal to 90 degrees.
