(57) **ABSTRACT**

A method performed by at least one processor in a 5G media streaming uplink (5GMSu) application provider (AP), comprising: negotiating, by a 5GMSu AP with a 5GMSu aware application of a user equipment (UE) and a third-party remote controller, at least a communication protocol and a command dictionary for remote control of a 5GMSu session; executing and updating, by the 5GMSu AP, the UE with a service announcement; and transmitting, by the 5GMSu AP, remote control information to the third party remote controller, wherein the third-party remote controller sends a remote control command to the 5GMSu aware application in response to receiving the remote control information.
