(21) Appl. No.: **17/906,312**

An electronic device includes: a battery cover with a hole, a battery module, a battery protection circuit board and a first functional device. The battery module is arranged on an inner side of the battery cover and including a battery and a battery protection circuit board arranged facing the hole. The decorative member is arranged on the battery cover and including a first decorative portion and a second decorative portion. The battery protection circuit board is projected to form a first orthographic projection. The first decorative portion is projected to form a second orthographic projection. The first functional device is located on a side of the battery protection circuit board facing the first decorative portion and arranged corresponding to the first through hole.
