(57) **ABSTRACT**

Display panel and display device are provided. The display panel includes: a non-display area including a first non-display area and a second non-display area oppositely arranged along a first direction, and a third non-display area and a fourth non-display area oppositely arranged along a second direction, the first direction intersecting the second direction; a first electrode connection structure at least in the third non-display area and/or the fourth non-display area; and a first area running through the display panel along the first direction, and the first electrode connection structure being outside the first area.
