(57) **ABSTRACT**  
  
A display panel including a display area and a non-display area, includes cell IDs disposed on a substrate in the non-display area and indicating identification information for identifying the display panel, and an insulating film disposed on the substrate and the cell IDs. The cell IDs include a first cell ID and a second cell ID disposed on the substrate in the non-display area, the first cell ID and the second cell ID are disposed in different areas, the first cell ID includes a single film structure including a first thin film layer, and the second cell ID includes a stacked structure of second thin film layers.
