(57) **ABSTRACT**

Various aspects of the present disclosure generally relate to wireless communication. In some aspects, a user equipment (UE) may receive, from a base station, a UE capability request message. The UE may transmit, to the base station in response to the UE capability request message, a UE capability information message that indicates one or more UE capabilities associated with one of a non-terrestrial network (NTN), a terrestrial network (TN), or both the NTN and the TN. Numerous other aspects are described.
