(57) **ABSTRACT**

According to embodiments of the present disclosure, methods, apparatuses, devices and storage mediums for interaction in virtual environments are provided. A method comprises presenting a first conference layout for a virtual conference in the virtual environment; detecting a change in participants and/or conference modes of the virtual conference; and adjusting the first conference layout to a second conference layout based at least in part on the change. Embodiments herein can lower communication obstacles for participants, reduce production costs of conference layouts, simplify operations to modify conference layouts, and enhance user experience.
