(57) **ABSTRACT**

A display device is provided. The display device includes: a flexible screen body including a planar area and a bending area connected to the planar area; a color filter disposed on the flexible screen body and at least covering the planar area; a protective layer disposed on the flexible screen body and at least covering a part of the bending area; and a coverplate disposed on the color filter and at least covering the planar area. The protective layer and the coverplate are arranged at intervals.
