No. 11,646,932, which is a continuation of application No. 16/671,784, filed on Nov. 1, 2019, now Pat. No. 11,283,674.

(57) **ABSTRACT**

Bandwidth part (BWP) operations for wireless communications are described. A timer may be started and a counter may be incremented based on a failure indication. A second BWP may be activated based on switching the first uplink BWP to a second uplink BWP of the cell. The timer may be stopped and the counter may be set to zero based on activation of the second uplink BWP.
