ABSTRACT

A measurement method, a measurement apparatus, a terminal, and a network device are provided. The measurement method includes: obtaining measurement configuration information and measurement report configuration information for a communication, where the communication includes at least one of a first communication or a second communication, and the first communication or the second communication is a SideLink (SL) communication; starting measurement according to the measurement configuration information, to obtain a measurement result; and sending the measurement result according to the measurement report configuration information.
