An information handling system includes a bottom case and a wireless charging puck. The bottom case includes a bay. The wireless charging puck fits into the bay, and is detachable from the bottom case. When the wireless charging puck is fitted into the bay, the wireless charging puck is configured as a power receiving unit to receive wireless power. When the wireless charging puck is detached from the bay, the wireless charging puck is configured as a power transmitting unit to provide wireless power to an external device.
