§ 371 (c)(1),

(2) Date: **Dec. 9, 2022**

Exemplary arrangements relate to a user communication device (1) for displaying images, which has an image display surface (12), speakers (19), and a microphone (11). At least one camera (10, 10a, 10b) is disposed in at least one region of the image display surface. When the device is used, the image display surface of a first device is positioned relative to a first user (14) such that the eyes (16) of the user are directed toward the at least one camera. Subsequently, additional users (20, 21) are positioned in front of additional devices in remote locations. The images of the additional users are displayed in certain regions (4 to 9) of the image display surface of the device of the first user, such that the users all appear to be positioned around a virtual table and able to look directly at one another.
