A control method of an electronic ink display apparatus, which is applied to a terminal equipment. The method includes: charging the electronic ink display device; outputting charging state prompt information, and after the terminal device establishes a wireless communication connection with the electronic ink display device, receiving a data update instruction and sending target update content to the electronic ink display device. Outputting the charging state prompt information includes: outputting charging completion prompt information in response to a completion of the charging of the electronic ink display device.
