A server and an electronic assembly including riser card and expansion card. Riser card includes first circuit board, first connector, second connector, and fastening pillar. First connector and second connector are fixed on and electrically connected to first circuit board. Fastening pillar is fixed on first circuit board. Expansion card includes second circuit board, third connector, and fastener. Third connector is fixed on and electrically connected to second circuit board. Third connector is plugged into second connector. Fastener penetrates through second circuit board and is fixed on fastening pillar of riser card so as to fix first circuit board and second circuit board to each other. Specification of first connector of riser card is different from specification of second connector of riser card.
