(57) **ABSTRACT**

A cassette transport device and a cassette transport system including the same are provided. A cassette transport device includes a main body, a travel unit to move the main body, and a plurality of flow-rate maintaining members to generate a flow of air in a direction opposite to a traveling direction of the main body, and flow-rate maintaining members of the plurality of flow-rate maintaining members are stacked on one another on the main body, arranged on a rearward side with respect to the traveling direction of the main body, and include a plurality of fans.
