(57) **ABSTRACT**

A display panel includes a pixel defining layer including a pixel defining pattern, a light emitting element including an anode, a light emitting pattern and a cathode, and a partition wall which is on the pixel defining pattern, the partition wall including a side surface which defines a partition wall opening corresponding to the anode of the light emitting element. The light emitting pattern and the cathode are in the partition wall opening, and the cathode is electrically connected to the partition wall at the side surface thereof.
