Related U.S. Application Data

(63) Continuation of application No. 17/257,153, filed as application No. PCT/CN2019/113401 on Oct. 25, 2019, now Pat. No. 11,564,152.

An IAB node performs a method for determining a periodicity of a SSB and/or a RMSI for use in an IAB backhaul link. The method may comprise one or more of: using a predetermined periodicity value; determining a periodicity value based on at least one different parameter; receiving a signaling message indicating a periodicity value and using the indicated periodicity value for the IAB backhaul link; and selecting a periodicity value from a plurality of permitted periodicity values.
