ABSTRACT

An electronic device is provided, including a main structure, a fixed member, a first circuit board, and a second circuit board. The main structure includes a first fixing position and a second fixing position, and the fixed member is affixed to the first fixing position and the second fixing position. The first circuit board and the second circuit board are disposed on the main structure, and they overlap each other. The fixed member is disposed between the first circuit board and the second circuit board.
