**ABSTRACT**

The present disclosure relates to the technical field of mobile power supplies, and provides a multifunctional mobile power supply. The multifunctional mobile power supply includes a power supply host machine. When the removable functional modules with different functions are embedded in the power supply host machine for charging, the mobile power supply charges the removable functional modules and also has the functions of the removable functional modules, so that one power supply host machine can be matched with the removable functional modules with different functions to obtain mobile power supplies with different functions.
