(57) **ABSTRACT**

A microwave heating device including a chamber and a plurality of microwave sources is provided. The chamber is configured to accommodate at least one target. The plurality of microwave sources are disposed at a top of the chamber to emit a microwave to the target. An included angle between a direction of microwave electric field of a portion in the plurality of microwave sources and a direction of microwave electric field of another portion in the plurality of microwave sources is between 80 degrees and 100 degrees.
