(57) **ABSTRACT**

A tray assembly is detachably disposed on a casing and includes a tray body, at least one gear set, a handle, and at least one side cover. The tray body is adapted to be accommodated in the casing. The least one gear set is disposed at a side of the tray body. The at least one gear set has a first engagement portion configured to be engaged with the casing. The handle is rotatably connected to the tray body via the at least one gear set. The at least one side cover is fixed to the tray body and covers the at least one gear set.
