(57) **ABSTRACT**  
A light-emitting element includes: an anode; a cathode; an EML therebetween; and an HIL in contact with the anode between the anode and the EML. The anode contains a metal oxide, the HIL contains PVP and PEDOT:PSS, and the HIL contains the PVP in an amount of from 0.16 parts by weight inclusive to 1.5 parts by weight exclusive per unit part by weight of the PSS.
