(22) Filed: **Mar. 23, 2023**

In a state in which a connection is established between a communication apparatus and a first other communication apparatus while a connection is not established between the communication apparatus and second other communication apparatuses, first information shared by the first other communication apparatus and the second other communication apparatuses in terms of the second other communication apparatuses is received. In a case where the received first information is included in a first field included in a received predetermined frame and indicating a transmission source of the predetermined frame, a data field after the first field of the predetermined frame is read.
