(21) Appl. No.: **18/196,483**

A charging device includes a base, a charging assembly, a filler, and a drain assembly. The base includes a charging groove and a receiving groove. The charging groove has a first opening and a second opening. The first opening has a first through hole. The receiving groove has a second through hole. The charging assembly is connected to the second opening. The filler is connected to an inner side of the first opening and disposed close to the first through hole, and has a connecting opening. Two ends of the drain assembly are connected to the first through hole and the second through hole respectively. The inner side of the first opening has a first distance, an inner side of the connecting opening has a second distance, and the first distance is greater than the second distance.
