ABSTRACT

(21) Appl. No.: **18/528,513**

(22) Filed: **Dec. 4, 2023**

(30) **Foreign Application Priority Data**

Dec. 27, 2022 (KR) 10-2022-0186379

A light-emitting device includes a first electrode, a second electrode facing the first electrode, and an interlayer between the first electrode and the second electrode and including a reverse potential layer and an emission layer, where a sign of a giant surface potential value of the reverse potential layer is opposite to a sign of a giant surface potential value of the emission layer.
