Related U.S. Application Data

(63) Continuation of application No. 17/675,091, filed on Feb. 18, 2022, now Pat. No. 11,916,360, which is a continuation of application No. 16/780,096, filed on Feb. 3, 2020, now Pat. No. 11,264,784, which is a continuation of application No. 15/254,051, filed on Sep. 1, 2016, now Pat. No. 10,554,025.

Conductor identification may be provided. A first sleeve may be placed around a first conductor and a second sleeve around a second conductor. Next, a first tag may be placed on the first conductor and a second tag on the second conductor. Then, the first conductor and the second conductor may be pulled together through a conduit. The first conductor may slideably move through the first sleeve and the second conductor may slideably move through the second sleeve as the first conductor and the second conductor are pulled together through the conduit.
