(57)ABSTRACT

Provided is an organic light emitting device that includes a light emitting layer comprising a compound of Chemical Formula 1 and a compound of Chemical Formula 2:

[Chemical Formula 1]
$$\begin{array}{c} Y_2 \\ Y_1 \\ Y_7 \\ Y_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_7 \\ Y_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_7 \\ Y_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_7 \\ Y_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_1 \\ X_2 \\ X_4 \end{array}$$

$$\begin{array}{c} X_1 \\ X_4 \\ X_4 \\ X_4 \end{array}$$

$$\begin{array}{c} X_1 \\ X_4 \\ X_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_7 \\ X_8 \end{array}$$

$$\begin{array}{c} X_1 \\ X_4 \\ X_6 \end{array}$$

$$\begin{array}{c} X_1 \\ X_7 \\ X_8 \end{array}$$

wherein any one of Y_1 to Y_7 is N, and the others are CR; Ar_1 and Ar_2 are each independently a substituted or unsubstituted \vec{C}_{6-60} aryl or C_{2-60} heteroaryl containing at least one heteroatom selected from the group consisting of N, O and S; any one of A_1 to A_{10} is a substituent represented by Chemical Formula 2-1 below, and the others are each independently hydrogen or deuterium:

[Chemical Formula 2-1]

wherein $\operatorname{Ar'}_1$ and $\operatorname{Ar'}_2$ are each independently a substituted or unsubstituted C_{6-60} aryl or a C_{2-60} heteroaryl containing at least one heteroatom selected from the group consisting of substituted or unsubstituted N, O and S, and all other substituents are as defined in the specification.
