#### (57)ABSTRACT

A radio frequency circuit includes an antenna terminal, a transmission filter, multiple reception filters, a first switch, and a second switch. In the first switch, a first terminal is connectable to a second terminal or a third terminal. In the second switch, a fourth terminal is connectable to a fifth terminal. The multiple reception filters are connected to the second terminal or the third terminal of the first switch. The first terminal of the first switch is connected to the antenna terminal. The fourth terminal of the second switch is connected to the second terminal of the first switch. The fifth terminal of the second switch is connected to the transmission filter.
