(57)ABSTRACT

Certain aspects of the present disclosure provide techniques for wireless communications by a user equipment (UE). The method generally includes receiving a downlink control information (DCI) with at least one block configured to trigger aperiodic sounding reference signal (SRS) transmission from the UE on at least one SRS resource set, determining a transmit power control (TPC) command to apply to the A-SRS if the DCI lacks a transmit power control (TPC) command for the at least one SRS set, and transmitting the A-SRS in accordance with the DCI and the determined TPC command.

RECEIVE A DOWNLINK CONTROL INFORMATION (DCI) WITH AT LEAST ONE BLOCK CONFIGURED TO TRIGGER APERIODIC SOUNDING REFERENCE SIGNAL (SRS) TRANSMISSION FROM THE UE ON AT LEAST ONE SRS RESOURCE SET

DETERMINE A TRANSMIT POWER CONTROL (TPC) COMMAND TO APPLY TO THE A-SRS IF THE DCI LACKS A TRANSMIT POWER CONTROL (TPC) COMMAND FOR THE AT LEAST ONE SRS SET
